

ABSTRACT OF THE DISCLOSURE

A clitoris stimulator having a vibrating device with a clip assembly adapted to be removably attached to the vaginal labia of a user. The clip assembly removably attaches to the vaginal labia to cooperatively bring in contact the vibrating device to the clitoris area. In an alternate embodiment, the clip assembly is mounted to a holder, instead of the vibrating member, and the holder cooperates to receive the vibrating member. The holder comes in contact with the clitoris area. In still another embodiment the clip assembly is mounted to the vibrating device directly. In all embodiments a sufficient and comfortable gripping action is exerted on the labia to keep the stimulator in place.
